Hi,

I used to play C&C Renegade a few years ago via Game Spy Arcade.

I recently bought C&C TFD and decided to play Renegade online once more.

The sad thing is I can't. Game Spy Arcade does not work (can't download stuff to enter Ranagade lobby) and I also can't log on to Westwood Online (never could actually, even the first time I played the game a few years back).

So, can someone write a step by step instruction on how to run Renegade online starting from a clean install from TFD?

Thank you for you help,

Michael

1. Install Renegade.
 2. Download and update to v1.037 if you haven't done so already.
 3. Make a copy of your whole TFD Renegade folder (as backup for your scripts 4.0/TT Patch Beta install.
 4. Install scripts 4.0/TT Patch Beta in one of those folders.
 5. Download RenList from here:
<http://www.renegadeforums.com/index.php?t=msg&th=38221&start=0&rid=2> 5967
 6. Use the GSA tab to find and connect to servers.
 7. For WOL see: <http://www.renegadeforums.com/index.php?t=msg&th=37326&start=0&rid=2> 5967

Download this

Where it says location point it towards your game.exe (Im not exactly sure where the exe is for TFD...)

Enter a name to use and then click on the GSA tab and you'll see the servers.

This thread is in the wrong sub forum btw.

Actually, if you're going to use 4.0, point it to launcher.exe instead of game.exe.
