Subject: Scripts 4.0 compatible D6 hud

I made the Deathlink6.0 hud compatible with scripts 4.0 (cuz I know some people prefer this hud over the normal hud). I had to replace the gps hud with a radar hud because the gps hud doesn't work properly with scripts 4.0 anymore though. There are also some other things from the d6hud that don't work with scripts 4.0 anymore (minecount, bullet bar, minihealthdisplay and miniammodisplay)

The download is in the attachments

Look's quite nice. I'll definitely be using this! Never was a fan of the original Renegade HUD

All of those features could be replicated, it would just need to be recoded to death.

yeah.....by not using tt

so all the useful, good parts are taken out. Lovely, i gotta get on this!

halo2pac wrote on Tue, 04 October 2011 20:37How bout the one with the scrolling radar map.. that is awesome.

This.

Not having map overview (it's hardly an advantage anyways) is quite annoying.

I would've kept the scrolling radar map in the hud, but it doesn't work properly anymore in scripts 4.0

I'd also like the scrolling radar map fixed

This is the point i'm making. It doesn't work and it's really annoying, surely someone could look into it.

Yeah lets give players a huge advantage with scrolling maps overlayed on radar

Then everyone can download. And everyone one would have advantage? I have an SSD and a overclocked i7. I have an advantage over half the players here. Go out and buy better hardware if you want that advantage too.

Same with bandwidth.

Same with bandwidth.

Why dont we all just fuck TT and download \*cheat name removed\*we can all have the same aimbot and all get instant headshots!

It will be fair then

P.S

I very highly doubt that your SSD and overclocked i7 gives you any advantage in Renegade.

When you play the game, is code running in the background that requires logical processing?

Yes, fast cpu gives a good advantage.

iRANian wrote on Wed, 05 October 2011 14:00Yeah lets give players a huge advantage with scrolling maps overlaid on radar

You're getting confused.

Map overview (map in your radar) is different than map Overlay (press a button to view the map across your screen).

Yes, fast cpu gives a good advantage.

Renegade runs well on pretty much anything faster than a P2-400mhz. GPU makes a difference in graphics, but if you fiddle with the settings you can run it on pretty much any GPU made in the last 5 to 7 years.

Yes, very true...but my point of better hardware = better advantage still stands.

Hence a shitty onboard GPU vs my GTS 250. Your going to lag while I stand and free headshot you. I know from personal experience on my old computer - I wasnt as good with the lag.

I was under the impression that the opposite was true. Am I wrong in thinking that people with lag are harder to hit? Lag scope comes to mind.

As to the topic nice job on the hud, but I prefer Renegade original.

In Renegade, better graphics = more smoke = harder to see enemies.

---
