RenGuard is pretty much completely obsolete. You can uninstall it and install scripts 4.0, which has built in anticheat.

If you're wondering why renguard was flagged as a virus is because renguard uses svkp.sys for the server list, which unfortunately malware uses it as well. But yeah what Cmatt said, scrap renguard and get 4.0.

To get it, look for the Tiberium Tech Forums and look for the first topic. Thats where you can get 4.0
