[View Forum Message](#) <> [Reply to Message](#)

i have approached and set a funwar date with st0rm

this is open to any renforums and/or jelly members

anyone that participates will have to use 4.0 to play on the server (it will kick non 4.0 users out)

Date: Saturday, November 12th

Time: 8 pm GMT (3 pm EST, 2 pm CST, noon West Coast USA)

Rotation: Remains to be set, but will include at least one or two co-op maps that Wilo has made which will put both teams on the same side

and probably some fan maps that people will auto-download with 4.0 if they don't already have them

the games will likely be played on a st0rm-hosted server

Com Match rules will likely be as follows

Toggle SpoilerTime limit: 30 minutes

Starting credits: 0

Crates: Off (default yellow on)

Pointmod: On

Ped beacon wins: Off

Donations: Off

Vehicle shells: Off

Weapons drop: Off

Weapons spawn: Off

Flaming infantry/vehicles: Disallowed

Wall jumping with vehicles: Disallowed

Wall jumping with infantry: Allowed

One man wall jumping: Disallowed

B2B: Disallowed

Building Hopping: Disallowed

Hitting base from first island (Islands.mix): Disallowed

Tunnel beacons (Field.mix): Disallowed

Signup: [31]*

[View Forum Message](#) <> [Reply to Message](#)

What about infantry ammo? Will it be limited or unlimited?

I'd like to say I can join this, but I can't really say that far in advance.

You can put me down. If something comes up, then something comes up... but otherwise I'd like to play.

anyone okay with this renestrategy?

1. get Nod on every map
 2. dont pick any flying maps
 3. get the renforums guys who dont actually play the game to buy techs
 4. jelly guys get arts
 5. get 10k+ points on gdi cause you get no points for hitting tanks with pointsmod and arty splash rapes everything
-

let me suggest a better one:

let someone with more experience at competitive renegade than you do the planning and leading, and then you do what that leader tells you to do.

Good games, only issues for me were on the FjordsTR map with low FPS. Glacier all over again.

Subject: Re: Jelly/RenForums vs. st0rm
Posted by [iRANian](#) on Sat, 12 Nov 2011 22:23:08 GMT
[View Forum Message](#) <> [Reply to Message](#)

lol we had nod on bunkersts and failcno, gdi on fjordstr and walls fly

bunkersts and failcano we won without any opposition because of sheer arty rape. Fjords, the only balanced map, we decide to just hold field, we have a bunch of mrls hitting hand and ob and they tried rushing constantly. we played walls fly instead of walls ground because it wasnt in server config. We hold field, they nuke all our buildings except bar (lol balance, at least not as bad as walls ground) and we win after time limit expired and someone killed hand.

Subject: Re: Jelly/RenForums vs. st0rm
Posted by [Di3HardNL](#) on Sat, 12 Nov 2011 22:35:55 GMT
[View Forum Message](#) <> [Reply to Message](#)

Yeah it were good games, we dominated most of the time though. The only game they could of won was Walls Flying, but they did it only with individual SBH nukes instead of proper teamplay which cost them the game in the end.

Anyway, looking forward to a possible next match against the same or another community.

Subject: Re: Jelly/RenForums vs. st0rm
Posted by [iRANian](#) on Sat, 12 Nov 2011 22:39:01 GMT
[View Forum Message](#) <> [Reply to Message](#)

They could have won fjordsTR too. failcano gdi and bunkersts gdi are a lost cause however. If they had walls ground they could have had easily won with 2 arties for every light and lots of techs.

Both teams should have bought more tanks on every map, on FjordsTR we even had snipers lol and our left side was exposed most of the game until I got my mrls there to whore ob and got some backup from the mammoths in the middle of the map close to the Nod tib field

Tbh I loved how in Walls_Flying we were destroying their tanks like instantly, with all the PICs and the 3 meds we had.

[View Forum Message](#) <> [Reply to Message](#)

I thought Fjords was heavily GDI bias. Half of our team wasn't really trying and we were able to fight off stank after stank with tiny groups of MRLS.

Nod got our Conyard early but that did absolutely nothing. I don't see how Nod could have won but then again I don't know the entire layout of the map.

By buying flamers/ltanks/stanks/arties/recon+raves to grab field with 2-3 apaches camping base. Its ridiculously easily to grab the middle and the river with nod, getting hill requires an apache abusing the trees or a recon bikes bumping an mrls.

instead they were doing half-assed rushes and they even had 2 sbhs to take out my mrls where one recon bike would have been enough

Nod's almost guaranteed to lose Fjords if they spend the game sitting on the Airstrip with Stealth Tanks. They have so many advantages that it's silly to waste them on a single unit, which requires an almost perfect window of opportunity to do anything.

If Nod held the field with Light Tanks/Apaches and used the trees to their advantage, a few Artillery pieces could easily shell the GDI base with Technician support. With the amount of damage that Artillery does, Nod would force GDI into losing a building early in the match.

i posted this on Jelly

Quote:Volcano [GDI st0rm / Nod J-RF]

Jelly started Volcano by destroying the GDI harvester twice, crippling their credit income and allowing Nod to push vehicles out early. Artillery destroyed the Refinery, and the rest of the base followed quickly, earning Jelly the win by base destruction.

BunkersTS [GDI st0rm / Nod J-RF]

st0rm pushed early and hit Nod buildings for points while both teams attacked the harvesters. Jelly was barely affording vehicles when GDI had medular tanks rolling across the map. Nod nearly lost the powerplant during a GDI push but reclaimed a medular tank. The Jelly war machine eventually marched st0rm back into its base and overtook it, winning the map by base destruction.

CrevasseTS [GDI J-RF / Nod st0rm]

iRan claims this map was a buffer map because he did not shoot enough buildings to claim the MVP title. Both sides rushed blindly and Jelly ended up destroying the Hand of Nod before st0rm destroyed the Barracks, winning the map by base destruction in 49 seconds.

FjordsTR [GDI J-RF / Nod st0rm]

There has never been a more tree-infested FPS-sucking map in Renexistence than this latest creation by the infamous Aircraftfucker. st0rm took advantage of the donate feature and pooled together to buy a transport helicopter that was used to destroy the GDI Construction Yard. Jelly asked what the fuck that building was for anyways and was undaunted; GDI took to the field with MRLS, medular tanks, and mammoth tanks. st0rm tried a second trans heli rush that was unsuccessful, and resorted to buying stanks. Jelly established a dominant point lead while Nod snuck around in stealthed tanks. The map ended by time limit, giving Jelly the win by points.

Walls_Flying [GDI J-RF / Nod st0rm]

Wilo failed to load Walls on the map but had Walls_Flying lying around. st0rm took full advantage of the building ramps and sbh nuked 3 of the 4 GDI buildings to death, forcing Jelly to defend the Barracks. During the second half of the game a South American hero by the name of NACHO-ARG successfully destroyed the Hand of Nod, allowing Jelly to kill the remaining Nod infantry and forcing st0rm to attack using only vehicles. GDI held out until the time limit expired, giving Jelly the win by points.

i didn't think to get a ss for carnage club because it ended too soon
i took some from the arach map
that shit was insane lol

we didn't get to do the co-op maps like we wanted cuz the server did not permit it, but we played some afterwards (including the Arach map as shown)

good games, thanks to everyone for participating

I thought crevasse wasn't played as it's DM and it wasn't in the rotation you posted. They had 11 Flamethrowers or so rushing through the middle downstairs while half our team was still loading, I killed 6 of them and two other guys also killed a bunch of them. They had shitloads of Timed C4 on our MCT and we would have lost the game if it played on for a few seconds more, it was ridiculously close.

Walls fly was also really close, if they stank rushed us with 20 guys at the end we would have lost. for the next comm war we should run some balance mod so most of the non-flying maps aren't so really biased towards Nod.

Basically:

- Remove Arty screenshake and splash (they didn't have a change on failcano and BunkersTS), it takes 2 shots to kill infantry with splash actually working properly most of the time with 4.0's netcode.
- Change Sakura into Kane (whatever team had Nod was outsniping the other badly because of 4.0's netcode, which removes all the flickering lag + scope lag)
- Remove SBHs for obvious reasons.

And next time don't pick failcano and BunkersTS, nor walls fly/ground. Even City walls/fly and Under are more balanced. On failcano both teams can kill Harvester with ease which means Nod has around 11 Arties out in a 20vs20 and then GDI can get meds 30 seconds or so after that, and GDI can't hold long or short sides of field because Nod can shoot them from inside their base and

with lots of cover. BunkerTS early game is retarded. GDI can rush the upper middle with shooters and c4 the harv from above as it passes from the middle to the Tib Field (even easier than on city), Nod can hide behind cover on the hill in front of Nod ref, then C4 the Harv in around 5 seconds by walking off it and moving a little bit, before GDI usually even notices them.

Walls fly has better balance but it's retarded when nod has SBHs. You can't even mine walls fly properly without 60-80 mines and most non-flying need 40-45 with the bugged mines. I'm not sure if st0rm was running their modded mines on the server.

Why were donations, SSGM crates and weapons drop on? Felt like I was playing on Jelly Marathon with the retarded mods.

And why were we playing with pointsmoD on lol, whatever map Nod has a few pointwhore positions GDI can't win on points. We were up 10 000 points on BunkersTS after 6 minutes of pointwhoring with only 6-8 Arties and they weren't getting any points from shooting our tanks. Same with Volcano, we pointwhored for 2 minutes or so and we were up 3000 points, they couldn't have won without base kill if they actually managed to survive failcano's early game.

iRANian wrote on Sun, 13 November 2011 05:02I thought crevasse wasn't played as it's DM and it wasn't in the rotation you posted.

wilo chose it as a map to play since his server wasn't going to support his two co-op maps we had agreed upon

truthfully had our c4 not blown up when it did we would have lost within another 10 seconds

i've never seen anything like that lol

iRANian wrote on Sun, 13 November 2011 05:02-Remove Arty screenshake and splash (they didn't have a change on failcano and BunkersTS), it takes 2 shots to kill infantry with splash actually working properly most of the time with 4.0's netcode.

-Change Sakura into Kane (whatever team had Nod was outsniping the other badly because of 4.0's netcode, which removes all the flickering lag + scope lag)

-Remove SBHs for obvious reasons.

dehhhhhhh

ok, removing the screenshake is fine, you can slightly lower the arty splash

leave sakura, the difference is not that large - you don't switch out the Nod soldier just cuz his head is slightly bigger

sbh aren't that useful most of the time, they just found a place to utilize them

iRANian wrote on Sun, 13 November 2011 05:02And next time don't pick failcano and BunkersTS, nor walls fly/ground. Even City walls/fly and Under are more balanced.

Volcano balances out better than you'd think, and i didn't care which team i had in that game

BunkersTS is the same - they actually got into our base in the beginning and had med(ular) tanks rolling before we had anything

iRANian wrote on Sun, 13 November 2011 05:02Walls fly has better balance but it's retarded when nod has SBHs. You can't even mine walls fly properly without 60-80 mines and most non-flying need 40-45 with the bugged mines. I'm not sure if st0rm was running their modded mines on the server.

they had the mines on fjordsTR jacked to like 70 or 80 but they were at 30 for the other maps (i believe)

iRANian wrote on Sun, 13 November 2011 05:02Why were donations, SSGM crates and weapons drop on? Felt like I was playing on Jelly Marathon with the retarded mods.

because Wilo initially turned those things off (i believe, i was there while he was working it through) but it didn't go through

he apologized several times (i was actually annoyed on two occasions when chefs with flamethrowers ran past me and blew up two vehicles at a time in epic kamikaze explosions on different maps)

in the end it was alright because the games were still playable

it was an organized game for fun, it's not like the loser got hung by their thumbs or something lol

iRANian wrote on Sun, 13 November 2011 05:02And why were we playing with pointsmod on lol that's a reflection of Westwood's intent with the point system

we were doing more damage to the more important targets (the structures, which cannot be replaced)

it's the same if GDI has Nod pinned in its base

they could not keep us off of their buildings, and as a result were losing in the point aspect

on volcano i made a point to kill the harv twice (i even got a sweet chem guy) so they couldn't get anything on time and we just slid right in uninvited before they could fight back

in st0rm's defense the settings they generally play with are far different, so they felt out of place on

several occasions

sla.ro(master) wrote on Sun, 13 November 2011 12:57 @Aircraftkiller: i remade that map into this what happened to that awesome giant beanstalk tree?

i had fun, and i'd like to thank everyone that participated
i'm going to upload some clips from the Arach map, because that was insane lol

lol, the difference between saks and havocs is a lot bigger than the difference between skill when you don't have any scope lag + flickering. I missed a total of 3 ramjet shots, I was even able to kill an SBH on ref roof when I was on the wall.

MaZu SBH nuked the pp or bar on bunkersTS, he would have never had it without an SBH. We could have easily gotten 3 guys together and SBH nuked three structures, which with our pointwhoring would have meant we would have gotten at least two. it's ridiculous. not sure why you think failcano is balanced when Nod will always have tons of arties out before gdi has meds, they even can shoot short side of field with arties from behind the hand, which is just dumb.

if Westwood intended the points system to be so retarded and Nod biased, they would have put it in one of the patches. we had 2 arties and a med on the left on bunkersTS, we were whoring ref and wf while wilo's med was hitting me for 5 minutes. He made like 250 points while I got something like 2300, I was checking the score list. There was another med and an mrls next to him, who also didn't get any points for continuously shooting us for 5 minutes.

we were doing more damage against their structures on bunkersTS, but their tanks got almost no points for defending, just check the end game screen for bunkersTS.

we should really try a balance mod for the next comm war, or playing maps on which you can counter arty+tech at 20vs20, like Fjords. also should definitely remove that pointwhoremocrap.

Yeah get 14 points for shooting a building with meds, while you get 20 for shooting one with arts. If they would have gotten field on failcano, we could have defended short side (tib field) by getting an arty behind hand and pp, they can't tech in tib so that's a lost cause for gdi unless they're rushing via short, which is impossible with teched arts. if gdi tries to go via long side of field, teched. arties will kill their hotties in 2-4 shots, not to mention the amount of points you get for shooting tanks + splashing techs with arties.

if they would have gotten field on BunkersTS we could have done the same kind of camping, on bunkers gdi is exposed when they try to attack nod structures while Nod can whore pp/bar barely out of their base in front of hand. My arty killed 5 meds when they rushed our PP at the start and I semi-instantaneously killed whatever engi/hotwire came out of their meds. I then got the remaining meds to push back and a few seconds later we got some tanks including a medium tank (lol tank shells) to gain left side of field. If they would have gotten field again later in the game we could have shot them camping behind our buildings on the left, and camping behind cover on the right, the only hard part is getting control of the middle, which is the most exposed part of the map, and is easy to get back from the left or right side of field.

iRan is just blindly raging against anything related to Spoony. I lost many braincells reading his posts in this thread regarding balance on stock maps.

The pointsfix and the inf ammo is, imho, some of the best modifications to happen to the game. Not everyone may agree on both changes but find a golden bullet against them both and we can talk.

As for bashing NS, make no doubt about it, IT IS the only server online now that feels as pure as pure can be. That's why I play on NS @ late PM/early AM times when few players are on; the mad mindfucking adrenaline rush is insane. If anyone doesn't feel that way or enjoy that kind of tension and pressure in the game, it's because they have been shooting buildings with an arty for hours in a 40 player server lol and they don't know Renegade.

This is why I hope NS maintains the current formula, keeps to the stock maps (which are pure mad insane on these settings with low players).

Of course, that's not to say I also enjoy Jelly Marathon equally but wanting to take NS off XWIS is just madness lol. Looks like iRan is bitter towards anything related to Spoony and his commendable efforts.

<3 iRan still.

NS has that pointsdoubler shit which balances out the points issue versus teched arties quite a bit, it's still ridiculously biased towards Nod. Didn't Jelly keep balance stats for AOW for a bit when they were running pointwhoremud and Nod won Islands 80% of the time?

Now I think of it, on failcano we could have done an eight man SBH nuke with 5 defending short and 7 defending long, it would have taken out at least 2 structures, probably 3 or 4. GDI obviously then could have done anything to whore our base with MRLS or they could have teched their meds. Who am I kidding? Hotties die to splash in 2-4 shots and MRLS on long get killed at about the same rate. Rushing Nod's base via long with 8 meds against 7 techs/arties is suicide. Doing an all-in via short is the best bet, although it will only kill PP and maybe Ref, at which time 8 nukes will be deployed inside GDI's base and GDI is fucked either way.

Best chance GDI has on that map is in 6vs6 games, starting from 24 players it becomes impossible to win the map if Nod gets teched arties spread out at 5 man short, 7 man long or 4 man short and 8 man long. Even on comm war level of play.

[View Forum Message](#) <> [Reply to Message](#)

yeah, i wasn't sure what you were talking about when you said Jelly was modded

to iRan: volcano with the pointmod was 1.01 GDI and .99 Nod

Islands was like 1.73 Nod

Mesa was 1.4 something Nod, Hourglass was 1.4 something Nod, Complex was 1.4 or 1.5 something Nod (1.5 = 75% win rate for Nod)

Canyon was 1.2 for Nod

this was over the course of hundreds of games, most with 10+ players per side
no weapons drops, no starting credits, no early donate

as for n00bstories:

with the points doubler thing also has it applied to the harv (i ate it with a chem guy two or three times on Volcano so GDI had no money and i was in 1st place with 600+ points ((Wtf?)))

my suggestions to them: make infantry worth 1.5x, vehicles 2x, buildings the same, and harv just normal

add the .5 extra credits/second thing that westwood intended (or so the coder people said)

or

have the points remain the same, but have a credits doubler instead (infantry yield 1.5x credits but 1x points, vehicles yield 2x credits and 1x points, buildings and harvester remain the same

Subject: Re: Jelly/RenForums vs. st0rm
Posted by [R315r4z0r](#) on Mon, 14 Nov 2011 22:29:17 GMT

By modded I mean with crates and weapon drops.

As for this whole pointfix thing... I never heard of any problems with points until it was first brought up a couple years ago. Now it is all of a sudden a big debate.

The game's been fine for 9 years; hundreds of people have played it and of the people who complained you could probably count them on one hand.

Even if the retail version is broken, it has worked for a long time. And from what I hear, the pointfix isn't as great as some people make it out to be. So you're suggesting "fixing" a "broken" mechanic with another broken one? I think it's too much effort to be mediocre if you ask me...

But then again, I'm not a Renewizard and I don't really pay much heed to clan stats and games... so take that with what you will. I just don't think it's worth all the drama when it comes to converting public servers.

no, it's just that most people don't know how to play gdi properly. you know this is true

remove the point bug + infinite infantry ammo + fix mesa deadzones = balanced between nod and gdi

what never gets mentioned is how badly gdi dominated many maps before the point bug was fixed. field, under, wallsfly... gdi barely even needed to leave their base and they won easily.

i also have a suggestion: ignore iran. every single time he's tried to make a point about the pointsfix or infinite infantry ammo, he's proceeded to immediately lose the argument and then randomly attack me with some lie or other. he repeatedly proves himself totally incapable of engaging the conversation in a civilised way, and he knows less about this game than the average person does anyway, so just ignore him.

liquidv2 wrote on Fri, 18 November 2011 18:58why not just fix all deadzones and altitude glitches
infinite ammo, it's neat and still a new-ish concept in ren
what if volt auto rifles shot 50% further than they do currently?
They are all fixed. If you play on a TT server that is

isn't hourglass better off with that shit fixed as well?
and i feel like mrls rockets firing down from the top on Under get a little goofy also
