hello, i play renegade for like 6 years? since i bought windows vista the game started to act weird. for example:

when i installed the game it works fine, i downloaded the patch and got online, when i started the game the next day it would start with no problems until i hit one of my keys on the keyboard, it crashed instantly (mouse works fine) later in the future (few days ago - when i cleaned my drive) i reinstalled it again exactley the same story i could play it for 1 day, and the next time i start up my computer it crashes instantly when i hit any key.

i tried to run in admin / xp mode, that did not work

annyone know how to solve this problem? its a great game!

That's your problem right there

I haven't heard this issue before. Did you install 4.0 (aka TT) aswell?
If not, could you try that?
