I was wondering if anyone knew the correct way to use Jon Wills version of level edit, I couldn't figure it out and it didn't come with a readme any help?

and another quick question about scripts 4, if a new map is added to a servers rotation will you automatically download it when joining the server? If so it would make it way easier to have a new maps server. Just wondering and thanks guys

Re: Jonwil's modified LE: Copy-paste new LE.exe over old LE.exe and run it.... that's all there is to it.

If you plan to use the LE for 4.0, you need to use the official 4.0 Level Editor, found here:
<http://www.tiberiantechologies.org/files/tt-tools-4.0beta3.zip>

Thanks for the help, I am using the new 4.0 editor now. The only problem that I am having is whenever I go to go into the walk around mode LE freezes and Shuts down, is there any way to fix this?
