---

it has some functions to give weapons with weapons names instead of powerups

```
WeaponClass * Add_Weapon( const WeaponDefinitionClass * def, int rounds = 0, bool  
give_weapon = true );  
WeaponClass * Add_Weapon( int id, int rounds = 0, bool give_weapon = true );  
WeaponClass * Add_Weapon( const char *weapon_name, int rounds = 0, bool give_weapon =  
true );
```

now im just a coding newby but is it possible to use it because what i have tried gives a linking error

```
void KB_Give_Weapon(GameObject *obj,const char *Weapon)  
{  
WeaponBagClass *Gun= ((ArmedGameObj *)obj)->Get_Weapon_Bag();  
Gun->Add_Weapon(Weapon,0,true);  
}
```

Error 2 error LNK2001: unresolved external symbol "public: class WeaponClass \* \_\_thiscall  
WeaponBagClass::Add\_Weapon(char const \*,int,bool)"  
(?Add\_Weapon@WeaponBagClass@@@QAEPAVWeaponClass@@@PBDH\_N@Z) C:\Users\robby

Is this a function in 4.0, or ssgm? I only ask because I'm not seeing it in Stock 3.4.4 scripts source.

You cant call WeaponBagClass::Add\_Weapon because its in tt.dll and not exposed to scripts.dll  
Plus, it wouldn't work the way you think it works anyway, there is extra logic in the powerup code that does special stuff when granting a weapon.

is there no way to add weapons manually somehow, maybe to change some defense weapons?

because samsites wont change their aiming angle anymore

also how far can object.gm mods go

if change an object his weapon and only server use it does it work? or wont the weapon fire then

What do you mean add manually? If you're just asking if you can grant a weapon to a player you do it by power up.

i used in scripts 3.4.4 a samsite for defense,if the defense script was attached it shot scattering missiles at average range.

on TT however the sam site models only aim in a specific angle

so i wanted to give for example the agt missile or obi laser, the samsite weapon so it can fire in all directions again

it fires but not has no real aim

Maybe this is me being logical but if you found such a thing (that is obviously a bug), maybe you should report it to the TT team instead of trying to make some odd workaround for it? Just a thought.

Are you still using the sam site quick turn object?

If you are, check and make sure it CAN aim down (Has a min tilt of at MOST 0 if not less).

---

---

---

min tilt -45 and max 45

it used to work on 3.4.4 i dont think they modified all the objects i used multiple sam sites.

only the object NOD SamSite aimed and fired in some direction but it aimed to high and only at vtols

what does 'sight arc' do?

---

If a vehicle had a sight of of 360 it'd be able to see all around it. If it had a sight arc of 90 it'd be able to see 45degrees to each side of its turret.

What script do the sams have on them?

none basic or not that i know off

i just attach JFW\_Base\_Defence

it used to be "M10\_Turret\_Tank"

after some more testing i noticed that it aims but above me  
so it will allways miss

im goin to test if its the M10\_Turret\_Tank script

don't use base\_defense on a sam site ... unless you want it to attack ground.

Quote:M07\_SAM\_Site\_Logic - Author: Westwood Studios

#### Details

The Turret act like a base defense, but only attac AirUnits.

#### Parameters

-- none --

#### Comments

Prefer this script instead of the other SAM-Site scripts, because these are maybe only for SP, some create an object after destruction, etc.

#### Known Issues

To improve the aiming of the SAM/Air turret, you have to edit the turret itself, there are no

---

parameters for this script.

robbyke wrote on Tue, 13 March 2012 18:50i want the sam site to attack all possible enemies so also ground units  
Test M07\_SAM\_Site\_Logic and see if it hits air units or if the aim problem persists, if it does then we have a even more odd issue then just the choice of scripts being used at hand.

---

results:

JFW\_Base\_Defence : no longer has any response wont fire wont react

M10\_Turret\_Tank : fires wrong mainly above the target  
also reacts to ground targets

M07\_SAM\_Site\_Logic : same as M10\_Turret\_Tank only doesnt respond to ground targets

used object SAM\_Site\_Quick\_Turn

i attached

the m10

and the m07

the m07 script aimed verry well if i hung still it would hit

the m10 script had bad aim but it aimed at me

i think the m10 script was never meant to hit directly

looked at the readme here are some base defence scripts (with info)  
cript Name: "RA\_Base\_Defense\_Simple"

Description:

A simplified version of a prototype script for a threat assessing Base Defense. It is capable of basic target prioritizing and can adjust its aim when firing at infantry. The script can be set to prioritize infantry, vehicles, or both equally. It will also rate targets based on remaining health, range, and if the target is a player or AI. Players are considered a higher priority than AI. The lower a target's health, the more likely it will be prioritized. The closer a unit is, the higher its priority is.

Script Parameters:

-MinRange: The minimum range to attack a target. Targets closer than this will be ignored. Default is 0.0.

-MaxRange: The maximum range to attack a target. Targets further than this will be ignored. Default is 100.0.

-AntiAir: Sets if the script targets aircraft. 1 = Yes, 0 = No. Default is 0.

-AntiGround: Sets if the script targets ground units. 1 = Yes, 0 = No. Default is 1.

-AdjustAim: Sets if the script will adjust its aim for infantry. 1 = Yes, 0 = No. Default is 0.

-TargetMode: Sets the script's target priority. 0 = Vehicles before Infantry, 1 = Infantry before Vehicles. Anything else will cause script to ignore infantry/vehicle distinctions and rely solely on range/health/player for prioritizing. Default is 0.

Notes:

Adjusting aim for infantry is useful for base defenses that fire "slow" projectiles, like a cannon. Infantry can typically sidestep these kinds of attacks. The adjusted aim targets the ground the soldier is standing on instead of the soldier. This causes the projectile to explode right next to a soldier instead of traveling another 20 or so meters before impacting the ground. For base defenses that fire "fast" projectiles or non-explosive projectiles, like a machine gun, do not adjust aim for soldiers, as the adjustment would likely cause the projectile to miss completely.

\*\*\*\*\*

Script Name: "RA\_Base\_Defense\_Powered"

Description:

A simplified version of a prototype script for a threat assessing Base Defense. It is capable of basic target prioritizing and can adjust its aim when firing at infantry. The script can be set to prioritize infantry, vehicles, or both equally. It will also rate targets based on remaining health, range, and if the target is a player or AI. Players are considered a higher priority than AI. The lower a target's health, the more likely it will be prioritized. The closer a unit is, the higher its priority is.

This one stops attacking if the power goes low.

Script Parameters:

-MinRange: The minimum range to attack a target. Targets closer than this will be ignored. Default is 0.0.

-MaxRange: The maximum range to attack a target. Targets further than this will be ignored. Default is 100.0.

-AntiAir: Sets if the script targets aircraft. 1 = Yes, 0 = No. Default is 0.

-AntiGround: Sets if the script targets ground units. 1 = Yes, 0 = No. Default is 1.

-AdjustAim: Sets if the script will adjust its aim for infantry. 1 = Yes, 0 = No. Default is 0.

-TargetMode: Sets the script's target priority. 0 = Vehicles before Infantry, 1 = Infantry before Vehicles. Anything else will cause script to ignore infantry/vehicle distinctions and rely solely on range/health/player for prioritizing. Default is 0.

Notes:

Adjusting aim for infantry is useful for base defenses that fire "slow" projectiles, like a cannon. Infantry can typically sidestep these kinds of attacks. The adjusted aim targets the ground the soldier is standing on instead of the soldier. Sounds like an issue with the samsites 3d model, perhaps the muzzle bone is angled wrong in the 3d mode; or maybe the muzzle effect fix 4.0 made for the mammoth tank barrels broke it some how.

Looks more like its just missing a muzzle flash/fire effect, probably used to have some really neat looking primitive effects and smoke that ea took out when they replaced some of the Westwood employees or whatever. It shouldn't be the issue; however, I still recommend you bring it up in the TT Thread.

---
