So i made a -to me- nice map for TCW before and i wanted to port it
to Renegade.
But after searching my harddrives i found that i dont have the 3dsmax8
file anymore.....
So, i tried to import the map W3D into 3ds8 but it didnt work :/ the terrain doesnt showup.
I also tried RenX importer but same problem

Could someone maybe try and import this thing for me so i can setup
the map for renegade?

The W3D is attached to my post in a zipfile

Thanks ppl

Nevermind
I fixed it
