I'm remaking my old PT Icons again
which would you prefer?

A

B

C

D is just A with the Logo in the top right, didn't feel like making a pic of it

i prefer photoshop, jk.

you should remove background and add a more cooler one, the weapons up right are nice, but without GDI logo

I was also thinking of removing the background entirely and just leaving the person and weapon with a view to the PT background

Example, ignore Patch

I suppose doing Characters in Action (as in combat) icons is out of your list.

I quite like the icons without the background to be honest.

Tried in action characters before and i couldn't get it to look good enough so i bailed on that idea

Decided on 2 versions

one with no background

the other with a background that ill decide on later (if i can find or come up with a good background)

I like it with no background, looks nice. But the characters look too dark. Are all of them going to be like that?
