Click the links above for the download mirrors, information and website.

You are now able to host your own server on GameSpy for Tiberium Crystal War.
Once online it will automatically appear on the server browser for players to join it!

Extract the RAR to your harddrive and edit the server configuration files ssgm.ini,
server.ini, tt.cfg and svrcfg_cnc.ini

Also take a look at the brenbot configuration files

If you need any help to setup your server you can always post in the forum linked above
or join us on irc.multiplayerforums.com in the channel #MPF-TCW
