My sound in renegade won't work at all, I think I may have deleted a folder or file that was in control of the sound. If you know anything or able to help, Thanks in advance.

Actually, as a TT developer, I have several ideas that might help solve your problem but since I find your impatience and spamming to be irritating I don't think I am inclined to try and help you.

As for trying to get my post count up... who on earth gives a flying turd about post counts? If you think they are somehow an important metric then you need to seriously re-examine your priorities.
