I only get it on Jelly lol, il upload how retarded it looks on my screen.

When I move its like I am moving against an invisible force then get dragged back a few feet, the shots where it looks like I hit people behind rocks, look retarded even on my screen to, I hit them, they move, then die. ./

At the moment im playing on a 20mb connection, and I even have a better ping in Jelly that I get in n00bstories

yeah same here i lag like fuck on jelly, less on NS

most of the time on jelly i just shoot randomly and people moving in straight lines lag back and forth, it's sad. :/

i just played a few games on area54's 4.0 server and i hardly missed a shot, kinda like on st0rm when they had a 4.0 server up

Nacho doesn't have the arrows on your ret, just the lines. That's why I liked it. Not too flashy.

Stefan is Greek name haha, I ain't no prozzy.

But yeah same, in area 54, I get something like 50 ping, and its shit easy to hit stuff

Also home come Jelly, a server running almost no modifications are compared to say area 54,

has a shit sfps allday, which gets worse depending on the player count, which is understandable, however, not in a 10v10 or something shitty, as far as my understanding was, is there is any sfps drop at all, even if tiny, it can cause unreasonable lag. I could be wrong and some derp told me

yeah on area54 it feels like i'm playing on LAN, i hardly miss anything because it's almost harder to miss stuff that hit things

jelly runs ssgm 2.0.2 which lags like fuck, but their server is shit so that's probably, they apparently pay the same amount of money for their servers that ccfan paid in 2006 (which i dont actually believe they do) and still get only 35 sfps when there are 50 players ingame LOL

The last I ever said anything of spectating was 2 days ago. Other than that, I haven't been spectated in quite some time. Can't even remember. So, me being the one you just said is highly unlikely. That, and that I don't really even play in n00bstories.
