DESCRIPTION

This was always in the earlier versions of SSGM before 4.0, but it didn't work correctly because of incorrect IF statements in the code. This plugin will enable the extra building report sounds that EVA says such as "Structure health under 50 percent" and also "Warning - %buildingname destruction imminent". In version 2, it will now report when a building has been repaired with "%buildingname has been repaired."

It will also report to the SSGM Log Messages prefixed with _BUILDING and state when a building is under attack like the early SSGM.

Example from my bot:

<CloudyServ> The Nod Power Plant is under attack!
<CloudyServ> The Nod Obelisk is under attack!

CHANGELOG

V1 - Release.

V2 - It will now read the building game object instead of the preset name.
- Reports when a building has been repaired to that team.

Ohh this is actually quite nice Xpert, I'll probably find a use for this. Keep up with the good work!

I got bored so I updated this plugin.

I changed the method so that it reads building game object instead of the preset name since every fan map has different preset names.

I also added when a building gets repaired but that sound will only play for that team that owns the building.

Thanks. I will try it on DragonServ.

Are you sure? I don't get warning messages and sounds on Dragonade.

LOL? Then you broke something. They already exist in Dragonade. See for yourself. Rencorner runs Dragonade. The building health sounds will play.

Nope, this was a feature in Dragonade back when it was running at Black-Cell, which was an even older version than the one Whitedragon publicly released.
