[UNABLETOREPRODUCE] - Playing in multiplayer then single player causes bogus credits display (jonwil)

NOT TRUE.. I'm not sure what specifically is happening in my server but as soon as I read UNABLETOREPRODUCE I was a bit like

So I booted up my server I entered. Was in there for like 10 seconds I pressed escape then pressed quit. I 'quit' my server aswell. I go to the home menu I press Singleplayer, then Commando difficulty. I'm in intro cinematic and I get this! See screenshot.

Sorry that I'm in windowed mode I couldn't make a screenshot of my Renegade without that, somehow it took a screenshot of my desktop then. (BTW I have 2 screens that's why you see a part of the desktop on the left side)

JonWil or somebody else I can give you my source/server file settings if you want.

Alt+PrintScreen to capture the current active window only

And please use the spoiler tags with large images xD

If you open the screenshot with MS Paint you can select the Renegade window with one of its tools and press the "Crop" button to automatically crop it out so you can re-save it again, should take like 20 seconds.

If you open Skirmish and then join a multiplayer server it'll show the blue stars on the radar, you can't use it to have both teams shown on the radar in multiplayer though.

Will crop next time -_- anyway that's not the point. The point is that there are Credits there!

Stars glitch should be fixed for the next build.

Bogus credits display is harder to fix than I thought, its not a game-breaking issue so its been moved to the "fix later" pile.
