be either gdi/nod get an apc and a hotiwre/engi/tech and put like 8 timed c4's on an apc and drive
the apc into an enemy tank wait for the c4 to explode and itll hurt the tank 400 points i took out a
mammy and only lost half of the life of apc (ur apc doesnt get damaged from your c4's) the
mammy did the damage

putting whether timed c4s or Remote C4s on the front of an APC and ram the enemy... you have
exactly 30 secs.!If you can do it...

i do it with 10 proxys, they seem to look like they have dissapeared after a certian distance, but
they r still there.

Getting a team mate to put remote c4 or proximity mines on you, when you are SBH is fun! Run
up to an enemy and boom! (If you use remote, make sure the person who put in you is watching
so they can detonate it)

You can't use this trick (well you can if you want to lose the APC   ) with remotes [Edit: your own]
or when you hop out, the APC will be neutral and be damaged/destroyed. I use Proxy Mines too.
You have to work too hard with timed c4 to get the timing right.
