the very big ROOF! or the one theres a platform on in all the flying maps? cozx if its the very big roof then u cud picture about 60 men climbing ontop of eachother, like trying to get in a really big wall. its easy to get on the part behind where the harvy docks without flying...

I cant get in the tower on non flying maps with no tank to help me....but on any map that isnt flying you have someone crouch down and you jump on them, they stand up, you jump on the ref. Takes practice.

Is infantry allowed to fire from inside barracks at the HON in Island map? what does Westwood say about this? A few people claim it's part of the glitch so it's not allowed i.e firing from inside the barracks at the HON.

This is just like base to base MRLS on Island. Very boring. Some servers will kick you for it. Others will not. My best bet is don't do it. People will leave messages telling you not to. Your own team mates will probably try and stop you if they can.
