I represent "Tiberian Technologies" (creators of the unofficial TT patch for Renegade) and am trying to find out what, if any, issues are known to exist when playing (or trying to play) Renegade using the new "Ultimate Collection" (as installed by the installer and patched by any official EA Ultimate Collection patches and with nothing extra installed on it). I am also trying to find someone who has an unmodified install (i.e. EA official UC patches only, no unofficial patches/extra mods) of the new Ultimate Collection (preferably running on Windows Vista or Windows 7) so that I can get some technical details related to it.

If you know of any issues, please post them here.

If you have an unmodified install (i.e. no unofficial patches, no "custom scripts.dll", no TT patch etc) and want to help me out with some technical details about Renegade in this new patch, please contact me via AIM/ICQ/Yahoo/MSN (details are in my profile) or contact me on IRC [irc.n00bstories.com](#) channel #tt

We at Tiberian Technologies do know there is serial/key issue installing the current version of the Tiberian Technologies patch on top of the Ultimate Collection and the technical information I am seeking is aimed at finding a solution to this problem (among other things)

just read that and hmmm new boxed game but the serial seem's to be used ?

maybe some one checked the game in the store prior to him buying it ? open take fast pic of serial with phone and of they go download a copy and have a new valid serial ?

dirty old trick to save on penny's...

chances are they are just sending out the copys on file that have already been used along with used serials .to save on money in the hope that no one is using those serials anymore

If that's the case then how come theres shitloads bans regarding to that shared serial... Which goes way back a good few months.

Maybe EA got the serial of the internet and putted it on their Ultimate Collection

they will be re-using old stock serials maybe

the code for the game is already written just need to write new cd.s
and maybe the same for serials why take the time to generate a mass of new ones if you have millions already on file just re-print and sell em out ..

maybe they think that out of the thousands of copys sold 10 years ago none are still used ????

who knows time will tell if loads of ppl get this same error

MDK, Maybe, but time will tell so far he is the only guy that had problem, He installed 4.0 straight after installing Renegade and that serial changer key doesn't work on Ultimate yet.

Azazel, No he bought it.
