NOTE: I don't hack, and I have a real serial number.

Tried joining Jelly Server today and it was full so I jumped into another game and it downloaded a map called Giganto something. It sucked, I quit, and tried to join Jelly again. I joined, but then got kicked by the admin for "Invalid Giganto.w3d"

Please help. In my Renegade folder, I can't find that file anywhere.

i'm sure someone here will be able to help you

for future reference, though, you should post on the Jelly forums when you're banned from Jelly; this is just a public forum for Renegade as a whole

That worked. Thanks.

And thanks to the other poster for linking me to their official forum.
