Subject: Problems to connect to WOL

Hey! I'm using Win 7, Scripts 4.0 and I'm having the problem that is in the FAQ(or not). When I connect to the WOL and try to see the servers no servers are shown. My firewall is Avira and it allows the game connect to the internet. No messages are shown either("no game servers found at this time"). And i checked the file host at C:\WINDOWS\SYSTEM32\DRIVERS\ETC and get this msg:

_____

Copyright (c) 1993-2009 Microsoft Corp.
#
This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
#
This file contains the mappings of IP addresses to host names. Each
entry should be kept on an individual line. The IP address should
be placed in the first column followed by the corresponding host name.
The IP address and the host name should be separated by at least one
space.
#
Additionally, comments (such as these) may be inserted on individual
lines or following the machine name denoted by a '#' symbol.
#
For example:
#
102.54.94.97   rhino.acme.com   # source server
38.25.63.10   x.acme.com   # x client host

localhost name resolution is handled within DNS itself.
127.0.0.1   localhost
::1   localhost

_____
If someone could help me I'll be grateful.

What does the MOTD say when you login to XWIS? (The huge dialog box that pops up between logging in and getting to the server listings)
