I want to replace the gunshot sounds for the LT and the Arty. Does anyone know if those files are in the always.mix? I've looked alot, but I don't know, I can't find it. Does any1 know the names of said files, or have themselves put in replacements?

Both of the tanks use tank_light_fire.wav actually. However, the Arty uses a slightly lower-pitch sound (with the lowerpitch being created in the game-engine) so note that.
