I think it sucks, and here's why.

Furthermore, I think related concepts like health and armor should be displayed in the same area and not opposite sides of the screen; when checking one you generally care about the value of the other as well. Separating them places an unjustified cognitive load on the user.

That is some terrible GUI/HUD design. Saberhawks list sums up quite nicely what's wrong with it.

Why do you even bother releasing this crap? Don't you already see how much of a waste of effort it is before you start? You don't have a feeling for design, not even close to it. It's not just bad, it could very well be the worst looking GUI in a FPS, ever.

Even the radar and ammo 'boxes' are having the cut-off corner at the same side. At least mirror them, not copy/paste paint fail herpderp.

Well, Iran, you just said it sucks for no apparent reason. Saberhawk, on the other hand, gave reasons WHY it sucked.

I'm just giving facts. If I made a map, and all he said was "it sucks because it looks bad", then I would be disappointed. WHY does it look bad? WHAT should I do to improve it?

Subject: Re: Night Vision Hud [4.0. Compatable] Posted by ehhh on Sat, 05 Jan 2013 16:43:47 GMT View Forum Message <> Reply to Message

if you made the map as bad as the hud is

tbh it would be pretty obvious

He's been criticized numerous times for why his work sucks and was also given tips by many people on how to improve. He doesn't take in other people's notes and learn from it. Now it just comes down to insulting his shit without giving a reason because people are just plain fed up with

him releasing garbage.

He has no artistic feel for any of his work. He doesn't put any kind of effort into anything nor does he understand how much it just sucks. I personally don't hate him, but his ignorance makes him blind with everything he does.

He knows how to use all these programs, yet refuses to put any kind of effort or time into actually trying to make a decent project.

Personally I like it and a few people do also, I understand many of you don't like it but remember not everyone has the same taste as you.

what some trolls can do.. off topics.. thats all they know.

i like the helmet style of the skin, but the bright green makes it weird, g1d, maybe you can make a second version with a less brightness (ps: ignore those trolls, they can't tell you how to improve something, thats all.. ren = few folks and 99% trolls).

Practice, practice, and more practice; that is key, everyone starts somewhere and over time we get better at whatever it is. Only way to truly fail is to give up and quit.

Look at the bright side, some people posting in here make really amazing ass shit, but they never release it or they lose the source code, at least he did release it even if it could use some work.

Thank you everyone for your words, and everyone who didn't just say "oh it sucks ass" Yeah obviously I am still kinda new at making huds I am still practicing some people like it so I release to the ones who do.

Edit: This is my first hud where I changed up everything and did everything from scratch, I spent a lot of time on this hud and I am satisfied how it turned out, anyway I am going to keep trying thanks everyone!

I think the first picture is pretty solid. I like the dark green coming out of the map box and weapon box. I am assuming the scope made it darker because the c4 on under is lighter green which takes it away =/
