Yo I just got the Level Edit. I want to mod single player missions. How do I make a soldier already placed in the map invincible, or how do I increase it's health? How do I edit those stats?

I want to edit all the GDI soldiers to be invincible/alotofhealth, and change their weapons and stuff, to make the campaign alittle more fun.

On that note, are there any good campaign mods out there?

Well for starters you need the Level files from SP, then you can change whatever you like. You can get here @ ftp://ftp.westwood.com/pub/renegade/tools/SinglePlayerLVLs.zip

If you want godmode to singleplayer just download this and place into your data folder, you will have to remove the file before playing online.. you can get it here

And for campaign mods i have no idea.. there where a few serverside single player mods... but i have no idea if you can download them.
