I am noobish with certain codes

I once found a way to change the text color of chat; team, public, and pages (dark blue text is really hard for me to read while playing)

I'm seeking someones help to accomplish my problem

HUD.ini codes please?

this download contains the ini file to change colors of certain text..

<http://multiplayerforums.com/index.php?/files/file/185-clear-chatbox-and-lime-green-hostprivate-message-pack/> it also contains some other changes... but you can just use the ini

file if needed..
