This thread will contain links and content of tutorials and helpful hints for modding C&C Renegade.

The thread is locked because I wish it to only contain the useful info, and not be diluted by flames and discussions.

Let me know if any of the links become stale or incorrect, and post links to ones you think should be added HERE.

You can contact me via different mediums see here
or send me a PN via the board

This first post will contain all of the links to external tutorials, and anything that can be displayed here locally (HTML format) will follow.

One of the largest and best Tutorial resources in the Web for Renegade, you should find most what you are searching for here:

I am letting Laeubi take over this thread so he can update it. As such, it is now unlocked. PLEASE DO NOT POST REPLIES IN THIS THREAD, rather make a normal post, or post in the other sticky thread. This thread is to contain tutorial/faq/howto info only.

Thanks
-Blazer
