Subject: Help: Show server on GSA Tab

Hey guys, my friend is having a problem getting their server to show on renlist's GSA tab. Before the closure it showed when hosted, now it doesn't. Do they need to edit any of their settings?

Not sure if this would be relevant but it is a password protected server.

Any help would be appreciated. Thanks

If they're running brenbot, then their brenbot is probably out of date and needs to be updated to the recent one that has the support for the new GSA master server.
