### ImperialKaskins's G10 Maps

In ImperialKaskins's G10 map series there is the ability to deploy several vehicles and blockades with the Q, N, B keys or an Anti-Tank mine with M using the Sapper character.  
Please download and extract to your data folder the keys.cfg from here.

### Active Server Plugins

Of course the server will run our own MPF\_NewMaps.dll plugin which adds additional functionality to the server such as Veterancy and Special Crates & Power-ups.

Other plugins running on the server are for example the Team Donate and !ammo purchase ability every minute. Type !cmds for a list.

You can also type !swap to change teams with someone on the opposite team, or to balance the teams.

For a full list of modifications and adjustments please visit our Website.

### Mappack is Available

You could download our Mappack before joining the server. This ensures you have all the maps already.

Then you will not experience (m)any ingame download dialogs which may take long if you have a slow(er) connection.

All you do is click Next, Next, wait for it to install the maps and then you're done and ready to join.

Thanks

Thanks people for reading this and maybe joining up the Weekend.

And good luck battling for the Counter Strike Global Offensive copies
