the idea of running around in C&C 3 walkers is cool, but you can tell which ones are from C&C 4 (because they look lame as balls, which is in no way your fault)

having stuff like that in Renegade sounds very cool
stealth tanks trying to drive circles around a walker to kill it, like a pack of wolves stalking prey

have a bunch of infantry and weapon models i maded to port in to a cnc 3 map, lost interest long ago but they are still on my hard drive, could send it to you guys if you want.
