Has anyone ever got Renegade running on their smartphone, one running Windows like the Nokia Lumia.

Is it possible?

No, I don't think so.

Directly on the WP device no, they just aren't the same and it won't happen, but you could use some Remote Desktop software like Splashtop to remote into a PC and play Renegade that way. Course you would need to find a bluetooth mouse and keyboard to connect to your phone to play it well enough or an OTG adapter to plug in a USB mouse and keyboard.

That sounds like a lot of trouble just to play on your smartphone, I say just stick with your PC.
