Me and my friend have created a Screenshot-Website for ur Renegade-Screenshots.

The URL is http://www.crapshots.tk

You can upload your own Screens and rate or comment the pictures from others.
Ther're many categories, for example:
- Stunts   -> your best Renegade Stunts
- Headshots   -> Aiming other's heads
- Chat   -> strange ingame chats
- Bugs   -> funny gfx bugs in the game
- Brag Corner -> nice K/D quotes, etc.
.
.
.

Many of you using n00bstories.com, of course.
N00bstories ia a great graphic host, i agree.
But if you wanna show you screenshots to public,
it isn't the best solution for that, because you
have to post a link to your screen/gallery in
another forum, and there you can discuss and rate
the screen, right?
I find it really difficult to find a screen on
n00bstories.com, because they're scattered in many
different galleries and there's no search feature,
or else.
It's 'just' a hoster, but a nice 1 ^^

And exacly that, we want to change with CrapShots.tk,
because the main task of that page is to show you best
screens to public, and to give others the possibility
to rate and comment you screens.

But now, we need your support to keep the page up.
If only a small amount of users upload their screens
and no1 looks at it, this project will die very, very
soon.
In that way, it would be REALLY nice, if you would
support us with your registration, (of course free *lol*)
your screens and/or simply your visit.

 We're waiting for ya!

I cant Upload images, I think there are some faults.
Why are the thumbnail file 100 kb and the image fiele on 50kb alowed?
And wha the programm don't genarte a thumnail itself?

Check PIMG - Bildindex programm it does thumnails itself. May you can adept the code.

ok, the program generates the thmbnails itself,
but you can optional add one.

other problems solved

Great site I am registering now but only one problem...

No right click I think sites that ban the right click suck although I can easily get around it it kinda
suck but anyway....

I love

so far hope it becomes a great sucess.

If you like screenshots then this site is good. Some intereting ones i have seen there and some are just normal. Could do with some more Sub catogories on some main catogorys though. Good Work!

you have to use an converter like irfranview (http://www.irfanview.com) it's free

you have to save it as jpeg with higher compression

I'd just like to congratulate you on making this site could become a hybride of n00b stories just soley based on screenshots

Spread your link around, put it on all the renegade sites and in the 'Top 99' (thats my home page) that should speed up the intake.

Don't let all your hard work go unnoticed.

The new folders in the n00bstories Image Gallery should make this obselete. Now you can create
your own categorizations of images and provide a link to a particular folder. You can also hide
folders from public view.

CrimsonThe new folders in the n00bstories Image Gallery should make this obselete. Now you can create your own categorizations of images and provide a link to a particular folderIdd. You can also hide folders from public view.

Could it be that you introduced that feature because of Crapshots? (no offend, just a question)

And I still think, that it's hard to find something, even when it's in a folder from a SINGLE User with a few screens in it.
Nice feature for a graphic HOST, I agree, but nothing real to compete with CrapShots, I think.

And it's NOT obsolete in any way.
CrapShots is much better to show screens to public.
N00bstories is the better host.

Why don't accept this, Crimson?

Yes, your site was the inspiration for adding the feature. I personally don't believe that someone should have to visit more than one site to fulfill a purpose. The "Folders" option allows you to not only sort your shots, but post an URL to go directly to a folder. n00bstories.com also operates without popup ads. I've always said that if you can't afford to have a site without ads, then don't have a site.

I have the bandwidth and existing system... why not make suggestions to me instead of starting up a new site?

I dunno where exacly your problem is, I think, it isn't the 1 popup, which is with the tk.domain. OK, I'm not going to afford a .com or else domain at the moment, right. But this fact won't tell you that the whole project is not good.

And another question: Why should I pay for something that isn't clear to be a success?

A project like this should be fun for all the users.

And how do you know, I haven't got that bandwith?
I think I can handle the actual bandwith easily.

The fact is, nobody is complaining about the f***** popup at this time. In this case I'm not going to change anything with this. (Don't tell me you haven't a popup blocker)

I was always the meaning, that it's better to try something own, as to start a project with some1 else :mrgreen:
- That was always my opinion.

And by the way, what's THIS bad to start something own?
Are you affraid to lose visitors or what ever?
Why do you try to compete with my page, if you are sure that the ppl would stay on n00bstories.com?

Let's see...
I think many ppl will stay anyway on n00bstories.com.

I hope this will not end in a flaming match or whatever.
I'm not going to shut down my site in the next time, as long as there're uploads, ok?

You can do your thing, and I'll do this in my way.

Why don't cooperate?
You stay the gfx-hoster and I try to become the 'publish'-platform.

Where's the difficulty with that?

-excuse my spelling, it's late in Germany :D-

You can get a .com domain for $8.95 at http://www.godaddy.com

I'm not afraid I'll lose visitors. You aren't the first, and you won't be the last to make a take-off of one of my ideas and try to make it successful. If I felt truly threatened, I would be deleting your posts and/or banning you from the site to keep you from advertising in this community. However, I'm not like that, so don't try and paint me in that light. Without the competition, I wouldn't have the drive to make my site better.

All that I'm saying is that if the community feels the need to go to another site and upload their images there as well as my site, then something is lacking in mine, and as a professional web developer, I'm going to fulfill that need if I can.
