If it's his work account, I'm sure he can't change that whenever he wants. And probably would be a long process to do so. And not to mention the fact of explaining why he wants a new one...

Madtone hasn't been around that last 2 days, woner where he is. I bet he will return with about 20 new models to spam on the Mod Exchange for us Anyway hope he returns soon.

If your using outlook then a spam filter normally works. Blocking html email reduced 95% of all my spam in my inbox, now i only get the messages I need and the rest is nearly always junk.

He's probably trying to delete the 36 tons of homosexual e-mail. And when it refreshes, he get's it all back. Poor guy...

So what if someone needs to send you an e-mail that contains html in it? Like / lists or <a> links or <h1> headers, etc.?

Even so, I must ask. Who uses their work email for public use, like signing up for a public message board?
