Hello, I am trying to round up some spare cash to build myself a Linux Box that I can keep online 24/7 and host my own small Renegade server (About 10 People). Anyhow, I was really wondering if anyone has any tips for a beginner on Linux, which version of Linux possibly to get, or just anything else that might be helpful. Thanks!

Redhat 8 works well. It wasn't quite excepted at the start, but now I think people are liking it.

Yeah, it start a bad start now people are liking it.

I need to go and buy one!
