lol, long time no post. (Been busy with work)

Argh, almost done the second version of my beta and this happens.

Error

All i can pick out of this is that it crashes everytime it loads the Alpha blend (l02_Snow.tga and Tibground.tga)

Check the textures are 24bit Truevision Targa files and don't have any strange settings when saved, you can use compression on the textures though. Apart from that something may have gone wrong in RenX with the texturing.

it's not from the Texturing, it was working halfan hour before that error ocured, and i didnt even do any editing in RenX during that time.

Try opening up those textures and saving them again? Maybe the files are messed up...
