I have boned Madtone's Ambush Jeep model that he made. I have added it to a heightfield map i made so you can test the vehicle. It is the first vehicle I have boned. The driving is a little weird as I cloned the bones and the preset from a pickup truck.

To download it and for more information see this thread

<http://modx.renevo.com/showthread.php?s=&threadid=273>.

It's already boned the Ambush Jeep. I boned it and put it on a map so you can see how it looks and works, download it from the link in the first post
