Thinking of picking one up, as the local Future Shop seems to have quite an abundance of them. Are they worth it? Any useful damage tables or strategies beyond regular n00b stuff?

How does it compare to this?: <http://www.cncseries.com/features/ursg/>

Never get strategy guides, you can always find walkthroughs and whatnot online. If they do come with the game however, good for you. Case in point is the Super Pack for Rainbow Six/Rogue Spear, and the NOLF GOTY edition, both of which are excellent buys.

I got one with the game, it is about the same as what it says on that link, not much point buying it when you could get it free online.
