there are things called:

Technology , and money.

And you need that to stand up in our world.

All I have is a regular cable connection. I am getting 400kb downloads... I have a nice computer, but I don't think I could host 16 on it...

Yeah, but how much is that per month? NICE. How much does a fiber connection cost. Heheh. :twisted:

Exactly the best I can get for that money is 2.0MBS down/ 384kbs up. That is amazing. Are you sure you aren't exaggerating. Go test that at http://www.dslreports.com/stest

i get about 2100/670 on those but its 33% more dunno why it does it. Cause i go over 670 upload when hosting all the time and ping for most is still under 200 so...950-1500 is max upload usually

Most people rarely d/l over 1mb, unless you have a router with multiple computers
