same thing happend to me so I downloaded the updated version of the game which took 1.5hours
@56K. That didn't do anything so I went to reinstal the game but found that it gave me the option
of just installing westwood registration which did the trick for me. See thread below "Topic: Is it
possible to re-install Shared Internet componets?"

insert your InstallCD into your CD-Drive wait untill the setup cam up (yes you must see the whole
into move   )
After that deselect all options instead of [x]Westwood shared internetcomponents

it just takes some minutes and Internetcomponets are reinstalled
