I've noticed a lot of players having problems with Bunkers lately. Like people "Falling through the floor" and getting stuck in "Blue Hell".

There is a simple fix for that. Get the proper version of C_C_Bunkers 2.0
http://www.cncden.com/ren_maps/C_C_Bunkers.zip Remove the older version of Bunkers prior to the new install.

The new map is very clean and fun to play in both AOW and sniper. I hope this helps with a lot of confusion.

Yup, and for those of you who don't know... You can get an elevator inside the Airstrip tower that takes you to the top of the tower. From there, snipe away or defend base with a Raveshaw... it is difficult for APC's or Humvees to hit you because of the angle... watch out for enemy snipers though

I dont fall in those hell holes but it sure is annoying. It seems my buildings just turn invisible till i buy something. Anyway, what will happen if you dont delete the old version?

Make sure you delete the old "*.thu" file too.

When I first played in bunkers I thought it was well... Shit. The textures were always disappearing, and i was always falling into blue hell. But now that the new version fixed everything it is one of the best maps I have seen.
