Renegde for me won't show the Advanced Game Listings. All it says is that it is requesting the channel list and then when it finishes, there is nothing for the servers. I moved all my mods and etc...but it still won't work

ok i had the same problem, first i reinstalled and it worked, THEN i re-downloaded all my skins and unzipped em and it stopped workin.
so i deleted all skins and unzipped the files again, 1 by one and i found it was the first person vechile MOD that was causing the problem.
hope it helps
