I have been looking for blue lasers for the laser rifle and chain gun for a while.

Does anyone know where I can get them? If not Could someone tell me how I could make them myself?

The colors are changed in Level Edit, when you go into the projectile's laser settings.

I don't think changing the skin will do anything as the PIC and the Obelisk use the same skin for their laser shape (I think the skin makes the shape), but a differant color settings.

Yeah I posted in their thread to see if I could get it.

I heard you can only get blue lasers through an objects.ddb file
