Hi, I do not know how to get it so that people can receive things from me. A while ago it was a picture and in a few days it will be a map. Does anyone know how and where to upload things to the internet for others to download them Thanks a bunch.

Either host your own website or find someone that will do it for you.

<http://www.renevo.com>

then click on the modx link

you can upload files there.
