You won't be able to use a picture directly from your local hard drive because there are so many other images out there on people's computers with the same name. Thus, you'll have to upload it somewhere on the Internet, and if you're not familiar with the services of n00bstories, I would recommend you look into Crimson's Image Uploader.

After you have uploaded put the following code in your signature:

Or for a linking image:

_General Havoc
