I have a problem with Blaze Regulator and i wonder if anyone could help. When i install the .net version of BR i keep getting the error about it needing to debug. i have updated it the proper way e.g. v1.1, 1.2 etc but i still get this problem. Please could anyone help.

YanoEpyonHey you avatar stealing wh0r3, go get your own avatar, n00b

I know you want to be like me, but you cant.

You don't have one

Actually, I believe Epyon was the first one to have that avatar, that's why it was in the reserved gallery. Him and I were in the IRC chat last night and we both asked Crimson for custom avatars; that GDI logo was his. I remember because Blazer thought it was cool and asked if Epyon could show him the Nod one as well. So that rotating GDI logo is not darkeye's.

That means darkeye34 (there are two darkeyes so be careful) gets a chicken avatar

Yes, thank you.

You can also look at the url for the image ..

[http://www.n00bstories.com/renforums/images/avatars/gallery/RESERVED%20Avatars%20\(Do%](http://www.n00bstories.com/renforums/images/avatars/gallery/RESERVED%20Avatars%20(Do%)
