I'm searching for a good uvw unwrap tutorial.
I've tried chilliskinner, but it can only handle basic shapes .
if someone knows a good uvw unwrap tutorial, please tell me then.
I've seen the one from madtone, in the tutorial topic. but I don't get it
I have some problems with my english, I'm dutch so I don't get everything
so does someone knows a easy uvw unwrap tutorial?

bah, its hard to explain it any simpler than i did in the tut, sorry mate...

Maybe try and just read it a few times and follow through it step by step, then more than likely,
every time you read it/follow it you will pickup more and more and eventually be able to do it.

Sorry i can't help more
