No problem, i have 32 all together, check my siggy! , i have all nod units, except for the chem tropper, all Nod vehicles, some GDI vehicles, and Havocs. All my bot mods drop 6 units, and the units will folow you, if they are on your team. The vehicle bot mods, only drop 1 vehicle, it also follows you, but it doesn't shoot, untill it is dhoot at first, even if it is on your team, and you are the first thing to shoot at it, it will come after you, you can also get into the vehicle bots, and control the yourselfef, but if the vehicle was shooting at something while you get in, sometimes the turret thing gets messed up, and you can't turn it.

Your Welcome, I could be meaner if you would like, and there are NO WORKING AIMBOTS FOR RENEGADE!! And If you actually find a place, that you can download an aimbot at, it is probably a virus of some sort, BTW ONLY N00BS USE AIMBOTS

not gonna release the URL, but i know a palce WITH a working virus free aimbot...

BUT, for those who think a aimbot is fun and want one, heres what they do: it ruins the game for everyone, it gets you baned, kicked, hated, and called names over it. It is not worth the time or effort to use

I ahve used that AIM bot befor, and it does work, i had 130 kills in a single 5 minute DM. that was the first, last, and ONLY time I have used it. Dont PM me saying 'I wanna see!' for all I know you are wanting to use it to win and not see what it is...
