Hi and sorry for my bad english,

My Problem have two parts:

I have C&C Renegade in 2 cd's, When I install the game this only uses the first cd and ends with Complete installation (supposing that all ok) , and i dont know for what the second cd are.

Another thing is that when I do click in the icon of the game from my desktop goes out a message that says:

" Cannot locate the Cd-Rom
-Please insert the correct Cd-Rom, select OK and restart application. "

This message come out with any of the 2 cds inside my cd-rom.

I really need help, because I cant play this game (installed) yet .

Chao...

thats strange because for me, when its a little over half installed, it tells me to insert the other disk (disk 2). Then, whenever i play I have to have disk 2 in the drive... you could try uninstalling and then installing again but exept for that, sorry, i have no idea...

CD 1 has the game and installation, CD 2 is the disk you use to play the game here in the USA.
