http://www.renevo.com/Downloads/RenEvo_SE.exe

sorry about that, unexpected windows retardation.

enjoy.

Lets you open up .mix's and it displays all the .wav's. Click on any one of them and the infomation

pops up, click play to play the sound before you extract it. Basicly lets you hear the sounds before extracting. I love it, it's going to make my job easier.

Yeah it's a great program because XCC works sometimes but not others. If I've been modding it starts scanning again and takes ages. It's idea for finding the sound for a patucular string. An play on Enter/Return reature would have been nice though. But great work.
