Yeah, the AI is retarded.

Is it possible to modify the AI in a mod? So they'd follow your orders, use vehicles, etc.

If it was, someone would have made it possible by now, if its not, someone would have to work so hard to make it possible, we would have to pay them, and make sure they get all copyrights.

You mean you were trying to get them to follow you or somthing by hitting "alt + 4" or somthing?  
Lol multiplayer practice is only to show you what multiplayer is all about and how it works.

They do make it seem as if the AI will 'obey' your radio commands cause they have those little arrows over their heads when U get close to them in an APC etc...but like you said the shit just dont work.

Good luck

Starting to think you're a n00b. "U". What next? "Ur"?

And I'm starting to think you hold a grudge against me. It is quiet obscure to critisize someone on their choice of typed verbiage in reference to the words I chose to shorten. Especially considering that they fall within the general accepted usage for this type of communication. You should realize that logic is very much a two way street. Using yours I could call you a 'n00b' for failing to properly construct sentences..but that would be ghey now wouldn't it ? I'm adding valid input to a thread based on recent personal experience and all you come up with is 'trying' to slam me for typing 'U' instead of 'you' !

I do not reside in the intellectual sand box but can come visit you here as often as you deem necesarry. I can not make you something you are not.

Better to remain silent and be thought a fool than to speak out and remove all doubt.
