Hello, I was wondering if there is a place i can download map packs? There are so many maps out there, and I hate sifting through everything to find the map i need, only to get to the next game and get booted cause i dont have the map. So if there is anyplace out there that has a ton of maps all bundled into one nice easy download, that would just be great! Thanks.

http://www.renmaps.com is the best place to get maps overall...

Many servers have a website that lists their rotation with links to get the maps. The best being The Pits -- http://renegade.the-pits.net
