[View Forum Message](#) <> [Reply to Message](#)

I'm very close to buying a 24 player server for Renegade. It'd REALLY help out if a few people would donate a few bucks. If you want to donate, give me a PM, if anyone wants to donate, I'll open a PayPal account.

This server will be up ALL the time, and will have moderators on all the time to make sure everything is running smoothly.

Donate money to guynamedmatt87@insightbb.com.

I will setup a forum and webpage when I get the dedicated server using Apache and vBulletin. If you donate you will get a special forum that only contributors can view. And you get VIP status in all the servers, wich means that regular mods can not kick you, only admins. (Note, this status may be taken away if the user abuses his/her privleges).

Sorry Im broke

Can I be a moderator?

And how are you buying it? Do you pay someone with a leet PC to host the FDS?

Really me too, I was going to go for 32, but I feel that 24 is just right.

I would be interested in helping out with a "few bucks". Could you place a number on how much money a "few bucks" is.

I just bought a 32 players server the name of the server is C0dyservr. I would like some help setting up the BR.NET.

Many people have tried to do it(including me) but it is really hard to set it up because of course it is a rental and i don't have psycally access to it.

I want to run a 32 sniper game because the server has a kinda crappy video card and people only get about 35-40 FPS when everybody have a tank and it gets terrible on field, but a less than 200 ping steady(that means it is good bandwith)I've never had any problems with it myself those are just statements from people that have tried my server, even though people seem to like my server and it has been full constantly since the first day i bought it. It doesn't lag at all if no one have tanks, I've noticed that because when a new map starts everybody have 60 FPS, so that's why i think sniper would be better and another reason is that i love to snipe .

I'm paying the server by myself and the main reason i bought it is because lots of people are leaving this game everyday and it is good to start bringing public servers so people would stick around for a longer time.

Anyway if anyone wants to help me i would appreciate it because I've been trying for 1 week now and i seem like im lost.

Plus when i get the BR working i will put up a site with forums and a ladder for it and i will need

lots of MODS to kick all those n00bs that refuse to buy vehicles instead snipers.

Reply this if you would like to help me out or send me a PM thx.

[View Forum Message](#) <> [Reply to Message](#)

Um, the video card doesn't matter. You're using the FDS, right?

[View Forum Message](#) <> [Reply to Message](#)

Your video card doesn't matter when you are hosting with the FDS. What speed processor is it? It takes a lot of umph to host 32 players.

Quote:

You may not:

Alter the maximum player limit on the servers. Remove @Klan-Host.CoM from your servers config in the MOTD or Servers Name unless you have paid for the de-branding option

Distributing the password for a "Private" server in attempts to utilize it as public. Passwords are to be used by members of the server team and distributed to corresponding opponents during a time of match or practice. Excessive use of a server resulting from the mass distribution of a "Private" server password can result in breach of contract.

Klan-Host's servers do not permit nor promote warez, cheats, cracks, or any violation of copyright laws and breach of contract on it's servers. Failure to notify Klan-Host of such violations by players on the servers results in a breach of contract. Any client found to be utilizing such items or enhancements will have services immediately suspended resulting in investigation and possible termination of services. Klan-Host are not responsible to refund the customer if they are experiencing so called "lag" or "latency".

Access via FTP to game folders is to upload MPMissions and alters the servers configuration, it should not be used as a fileserver.

Although, you can remove it for an extra 5 dollars a month. Still, I'd rather get a dedicated server.

Blazer and I want to get people together to run a server... those who contribute would be like part-owners of the server and have a say in how it's run, server settings, etc... we'll also have forums for them and all that jazz, you'd be moderators of them.
