Check it out. You can see small bugs and issues in it, which are currently in the process of being fixed.

Hmmm, well what codec does the Video use?

Try exiting WMP and reducing the Divx quality level and check off Smooth Playback and double buffering.

That looks so cool. I played "keep off the grass" for a bit when it was released. This looks much more refined than that.

Thanks for all of your hard work on this mod.

Very good RenAlert mod team Very Very good, except, you should have had Hell March Playing instead, I love that song, I always have it playing whenever I play the mod, just to add to the Red Alert feel of it, and also is there going to be a Red Alert 2 mod?

Infinintthey cant make money off the mod becuse its still part of renegade  
yet if you could its would be worth as much as renegade (ITs so good!)However, i do believe that  
they can make money if they were to offer the released product written onto CD, mailed directly to  
the clients address instead of downloading it. As they are paying for the postage & packing, not  
the mod itself.

This is what the guys have said that are making the Desert Combat mod for Battlefield 1942.

They can not charge anything for this without the express concent of whoever holds the copyright. In this case EA. Any expenses incurred by them can not be recoverable by the sale of the product. Unless they want EA to sue.
